DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-58 and 217-220 are drawn to secure transactions including authentication, classified in class 705 subclass 67.
 - II. Claims 59-92 are drawn to electronic book viewing, classified in class 705 subclass 1.
 - III. Claims 93-118 are drawn to usage protection of data files, classified in class 705 subclass 51.
 - IV. Claims 119-216, drawn to secure transactions, classified in class 705 subclass 64.

Inventions I, II III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as a an Electroniv book view in the instance of invention II, broadcasting an authorization signal in invention III and a delivery system in invention IV. The subcombination has separate utility such as a viewing an electronic book or receiving an authoring signal or a delivery system.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
